8 **Supplemental figure:** Accumulated rainfall as estimated from the interpolation of rain gauge  
9 observations using inverse distance weighting; accumulation period from Aug 6 (00:00 UTC)  
10 to Aug 9 (20:00 UTC). Basins draining to Metropolitan Manila are shown in orange,  
11 coastlines in white. Major cities are shown as white squares, while rain gauges are represented  
12 as white circles.
