Table 1 of the paper contains a duplication in the last row. Instead of “Unreliable”, the last row should read “Not reliable at all/not used”. The correct table is as follows.

**Table 1.** Standard individual reliabilities of the spillway gates.

Case	Reliability
Non-gated	100 %
New / very well maintained	95 %
Well maintained, some minor problems	85 %
Some problems	75 %
Unreliable	50 %
Not reliable at all / not used	0 %
