

| Rock mechanical parameter                | Number of specimens | Relevant standard |
|--|---------------------|-------------------|
| Bulk density                             | 53                  | EN 1936:2000      |
| Water absorption                         | 18                  | EN 13755:2008     |
| Propagation speed of the ultrasonic wave | 53                  | EN 14579:2005     |
| Uniaxial compressive strength            | 31                  | ISRM 2015         |
| Modulus of elasticity                    | 31                  | ISRM 2015         |
| Tensile strength (Brazilian)             | 23                  | ISRM 2015         |
