The figure shows a scatter plot of the number of buildings across different models. The x-axis represents the models (M_{10\%}, M_{25\%}, M_{50\%}, M_{75\%}, M_{90\%}) and the y-axis represents the number of buildings. Different symbols are used to represent different building levels: Total (square), Very high (red circle), High (orange diamond), and Moderate (yellow diamond). For example, the M_{10\%} model has 78 total buildings, with 44 very high, 94 high, and 78 moderate buildings.
