Figure 6.
Time series of ensemble of (a) SLP at grid of cyclone centre, (b) latent heat flux, (c) precipitation averaged, and (d) averaged wind speed exceeding 95th percentile within the 250km radius of the simulated medicane. (b) and (c) are averaged value within 250km radius The gray bar and red lines denote the variables of PRS and PGWs (with different markers), respectively. All variables are ensemble-mean. Note that the values of TD TP_MN and TD_W5_MN in PGWSST are excluded from the ensemble mean from 2000UTC-08 and 2100UTC-08, respectively, due to the extinction of simulated medicanes.
