

**Key vulnerability
indicators**

Proportion of seniors

Proportion of residents aged 65 or over

Socioeconomic status

Composite indicator including proportion of households with relatively low income and proportion of tenant households

Access to green space

Green space per resident (considering use-intensity), where green space is at least partially shaded, within 200m of the residential area and publicly accessible

**Synthesis
maps**

Relative social vulnerability to pluvial flooding

= Proportion of seniors + Socioeconomic status

Relative social vulnerability to extreme heat

= Proportion of seniors + Socioeconomic status + Access to green space
