

Data collection

Dec. 2021 – March 2022

Random sampling

7,000 contacted households
response rate: 9 %
n = 649

Purposive sampling

of affected households
~17,000 contacted households
response rate: 6 %
n = 1,013

Convenience sampling

link shared in local
newspapers & Facebook Ads
response rate: -
n = 203

Data preparation

1,865 respondents

Excluded

Incomplete interviews
(n = 251)

Completed interviews
n = 1,614

Excluded

Due to

- insufficient effort responding (n = 10)
- small cell sizes (n = 20)
- missing data on dependent variable (n = 13)

Analytical sample
n = 1,571
