

Corrigendum to “Earthquake lights and rupture processes” published in Nat. Hazards Earth Syst. Sci., 5, 649–656, 2005

T. V. Losseva and I. V. Nemtchinov

Institute of Geosphere’s Dynamics of the Russian Academy of Sciences, Moscow, Russia

Part of Special Issue “Seismic hazard evaluation, precursory phenomena and seismo electromagnetics”

Page 654, Fig. 8 should be replaced by the figure given below. The corresponding caption is correct.

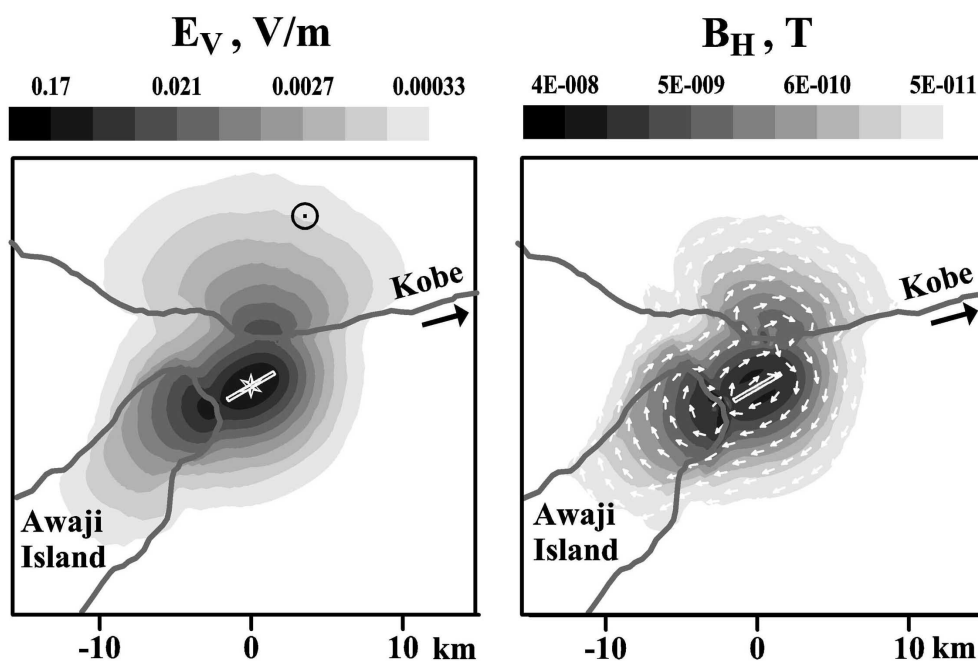

Fig. 1. Same results as in Fig. 5, but accounting the sea water layer with the depth of 100 m and real coastline (dark gray lines) near Akashi strait (variant SV1). The epicenter is marked by a star. The directions of the active part of the fault are shown by white line.
