

Interactive comment on “A preliminary evaluation of surface latent heat flux as an earthquake precursor” by W. Zhang et al.

Anonymous Referee #3

Received and published: 9 September 2013

Upon my second reading, and with the initial comments by reviewers Geller and Quiang plus the review by Geller (dated Sept 3 2013), I recommend to publish the paper in its revised version, as submitted by the authors a while ago.

I understand that with my statement all formal requirements are met to do this final step. If not, pls accept the "pre-review" by Quiang as a full review!

WBR, Achim Kopf
