

***Interactive comment on “Extreme storm surges:
a comparative study of frequency analysis
approaches” by Y. Hamdi et al.***

Anonymous Referee #1

Received and published: 17 December 2013

The paper describes different techniques for extreme value statistics of water levels for a case study of French coastal stations. The methods are not new, but the study is comprehensive and therefore valuable for the journal. However, the writing needs to be improved strongly. Suggestions are given in the attached pdf
