

***Interactive comment on “Reducing volcanic risk on Fogo Volcano, Cape-Verde, through a participatory approach: which out coming?” by P. Texier-Teixeira et al.***

**Anonymous Referee #5**

Received and published: 11 February 2014

In my opinion the paper "Reducing volcanic risk on Fogo Volcano, Cape-Verde, through a participatory approach: which out coming?" by Texier-Teixeira et al. may be accepted for publication in NHESS. I only suggest some technical corrections:

Pg 6562, line 13: delete 'in' before local communities;

Pg 6562 line 13: 'dialogue' instead of dialugu;

Pg 6564 line 23: VCA is for Vulnerability and Capacity Analysis while in Pg 6575 line 01 VCA is for Vulnerability and Capacity Assessment;

Pg 6564 line 24: the explanation of the acronym NGO should be here;

C2531

Pg 6569 line 14: authors stated that 'Presently, the community is being connected to the telephone and internet networks' but, in the community vulnerability of Figure 5, it is reported the lacking of communication facilities (phone/internet);

Pg 6570 line 15: is 'Cha' for Chã das Calderas? If yes, add in the text;

Pg 6572 line 04: the explanation of the acronym FGD should be here.
