Interactive comment on "Deformation information system for facilitating studies of mining ground deformations – development and applications" by J. B. Blachowski et al.

J. B. Blachowski et al.

jan.blachowski@pwr.wroc.pl

Received and published: 20 February 2014

We think that the number of views and downloads of our paper substantiates the proposed approach and the DIS concept. We are thankful and agree with the comment regarding the DIS role as a base for analyses of mining terrain deformations.
