

Interactive comment on “Seismic behavior of buried pipelines constructed by design criteria and construction specifications of both Korea and the US” by S.-S. Jeon

Anonymous Referee #2

Received and published: 21 July 2013

My apologies for the delay on the review of this paper.

Please see the attached comments. The paper reads fairly well, and I have commented on a number of 'minor' items of formatting, language order, inclusion of sufficient in-text citations where facts are mentioned. The only 'medium' level item I have are regarding: (a) A feeling for how sensitive the numerical modelling is if the variables are varied slightly. (b) Some measure of the uncertainties in the results for Figures 6-9.

Please also note the supplement to this comment:

C572
