Dear Reviewer, thanks for your comments and precise recommendations to enhance the paper.

Please find the proposed changes : **1. In my opinion it is necessary to make the formulas more readable by adding a nomenclature/ symbols list of the different terms** Right now symbols are explained in the text using, we can understand your comment at there are many of these symbols, will put them in a nomenclature section either in the Model section or at the beginning of the paper if it does fit well.

2. On 3.2 section (Data preprocessing) add a list of the 10 fuel classes considered and related parameters We will put the full list in additional material, but all fires

considered burned within areas of the 3 main classes (schrubs, maquis, mixed pine), that we will detail in the paper.

Best regards
