

Interactive comment on “Rockslides on limestone cliffs with sub-horizontal bedding in the southwestern calcareous area, China” by Z. Feng et al.

Anonymous Referee #2

Received and published: 30 July 2014

Dear editor, Thank you very much for nominating me as a referee of this paper. In recent decades, massive rock slope failures occurred in the southwest China and drew great attentions of Chinese engineering geologists. This paper presents three interesting cases of rockslides in limestone slopes and I think it can be accepted with minor revisions. Please find the comments in the PDF. Regards.
