Received and published: 4 August 2014

This is a really interesting paper. It has been subject of 3 reviews (two minor, one major) with really useful feedbacks. All the reviewers think that the paper should merit publication after several changes, that at my eyes they are very easy to address. The authors provided detailed and satisfactory replies. Based on this NHESS discussion, I think that the authors should have a chance to propose a revised version of their work.
