Dear Editor, here our final comments and the material for completing the review of the paper NHESS-2014-184. I apologize that I've uploaded preliminary posts to the referees, but all the points raised by them have been fully accomplished by the answers, and by the modifications done in a unique annotated pdf file. We attach it here, in a zip file containing also the modified figures (done to accomplish Ref #3 comments) and a new release of Appendix B (some minor bugs fixed). There are several minor changes in the main text, which are visible with Adobe Reader. Please do not hesitate to contact us in case of problems.

Hoping in a positive and quick answer, we wish you and all the staff a Merry Christmas

C2719

and Happy New Year.

for the authors Laura Peruzza
