

***Interactive comment on “Integrated seismic risk analysis using simple weighting method: the case of residential Eskişehir, Turkey” by E. Pekkan et al.***

**Anonymous Referee #2**

Received and published: 8 January 2015

I thank the authors for addressing and clarifying all the points raised by me in detail. In my opinion, the manuscript has improved significantly since the authors' original submission and once it will include all the changes will be ready to be published.
