Received and published: 15 January 2015

Dear Dr. Scoville,

Thanks for your correction. I apologize for having confused Figure 4 and Figure 5 that correspond to two different configurations of the experiment by Dahlgren et al. (2014). My aim was to point out that in Figure 5 the difference between the dry (Figure 5a) and saturated (Figure 5b) samples of gabbro during repeated loading cycles is the lack of stress-stimulated or transient currents in the saturated sample.

Sincerely,

Fabrizio Masci
