Dear Dr. Marc and Prof. Hovius,

The discussion period on your submission to NHESS entitled "Amalgamation in landslide maps: effects and automatic detection" is now closed.

Two independent referees have examined your submission, and have posted their comments. Both referees have found your work significant, and worth publishing in NHESS. I share their general comments on the relevance of and significance of your work.

The two referees have also outlined a few weaknesses in the paper. It should not be too difficult for you to address the problems outlined, and to modify the manuscript

C3409

accordingly.

Please respond to the comments posted on line, so that I can proceed with a formal editorial decision.

Best regards,

Fausto Guzzetti NHESS Executive Editor
