Dear Sir, I would like to express my gratitude and sincere appreciation for your close attention given to our paper. Your evaluation of our paper is of importance for us. Your opinion about the use of our results for designing surveillance systems for tsunamis in real projects is really valuable. As for your comments about Figures, I agree that adding the axes labels will help in their better understanding. We have omitted such labels, trying to avoid cramming the figures with details. I will try to correct such omissions. Your comments about the typos are fair. Thank you for a careful reading of our paper. Sincerely, Dr. Tatyana Voronina
