Received and published: 4 May 2015

Dear Dr. Hilber and Dr. Stark,

the open discussion phase on your manuscript entitled "Seismology of the Oso-Steelhead landslide" is coming to an end. Three independent referees have posted their comments, which are quite positive.

I have read the comments and recommendations of the referees, and your detailed responses to them. I have found your comments comprehensive and explanatory.

Based on the comments of the referees, your responses, and my own reading of your work, I have decided that the paper can be accepted for publication in NHESS, subject to minor revisions.

C3704

Given the size of the reply you have prepared, it should not be too difficult for you to prepare a revised version of your work that addresses the issues raised by the referees.

When I will receive a revised version of your work, I will examine it and I will take a final decision on its acceptance for publication in NHESS.

In submitting the revised version of your work, please be sure to include a list of the changes made to the text, and your responses to the comments of the referees. This will help significantly my own editorial work.

Sincerely,

Fausto Guzzetti NHESS Executive Editor
