Received and published: 29 May 2014

Very interesting paper. It was a pleasure to read the contribution. The concept of public perception of risk is typically under represented and poorly addressed in mainstream literature.

My compliments to the collective authorship for a well written contribution which was properly edited before submission.

I believe all parts of the paper should remain.

There are a number of minor grammatical, syntax and typographical errors which I have corrected on the attached pdf.

C914

Most critical change is the citation for Morgan 1991.
