Thank you very much for your comment you may also want to look at the paper from Orpin et al. (this special issue), which use a similar approach focusing on the Tokelau atoll, in the SW Pacific, and therefore nicely complement this paper in providing another example of tsunami modelling for isolated Pacific Island.

Orpin, A., Rickard, G., Gerring, P. and Lamarche, G. (2015) Tsunami hazard potential for the equatorial southeastern Pacific atolls of Tokelau from 1 scenario-based simulations. Natural Hazard and Earth Science Processes, 3: in press.
