

***Interactive comment on* “Social vulnerability of rural households to flood hazards in western mountainous regions of Henan province, China” by D. L. Liu and Y. Li**

B. Dewals

b.dewals@ulg.ac.be

Received and published: 7 December 2015

The Authors may wish to refer also to the study by Ernst. et al. (2010) which provides an index-based approach for assessing social vulnerability to floods as well as social impacts of floods. For more details, see my other recent comment: C2517: ‘Social vulnerability and appreciation of social impact of floods’, Benjamin Dewals, 07 Dec 2015

Ernst, J., Dewals, B.J., Detrembleur, S., Archambeau, P., Ercicum, S., Piroton, M. (2010). Micro-scale flood risk analysis based on detailed 2D hydraulic modelling and high resolution geographic data. *Natural Hazards*, 55 (2), 181-209.
