Received and published: 26 December 2015

Dear authors,

I have been reading carefully your paper and, even if I am not an expert in this field, I failed to understand the methodology used given several repetitions and unclear statements.

Thus I agree with the referee comment that the paper requires complete re-writing and I suggest you take time to re-write it completely, explaining better how the theory is applied to the concrete case you show, following the two referee comments. I do not
