

Interactive comment on “Impacts of European drought events: insights from an international database of text-based reports” by K. Stahl et al.

K. Stahl et al.

kerstin.stahl@hydrology.uni-freiburg.de

Received and published: 28 December 2015

We thank reviewer Kelly Smith for her positive assessment of our contribution. In light of her review, we suggest to edit the manuscript slightly during revision to improve phrasing and highlighting of the main contributions of our work with respect to e.g. defining protocol for large scale analysis and the other aspects raised in her review.
