Received and published: 19 April 2015

Dear authors,

the discussion phase on your work is now closed. Two independent referees have examined the paper, and posted their comments on line. Overall, the two referees concur in judging the paper of potential interest to the journal.

I have examined the manuscript myself, and I share the opinions and the suggestions of the two referees.

The referees, and particularly the first (anonymous) referee, have raised some concern that need to be addressed, before the paper can be considered for publication in

C459

NHESS.

Consider adding proper coordinates to Figures 1, 3, 4 and 6.

Please consider these points, and all the other points and suggestions raised by the two referees when submitting your online responses.
