In the text you mention both a strategic and operational approach. I suppose this is based on the Frame of Reference approach of Van Koningsveld et al, which you put in the refs but you do not cite.

To be strictly correct, the first real application of the FoR for the evaluation of flood impacts was done in the Micore project, as you see in the following paper which I think should be cited for completeness

Ciavola P., Ferreira O., Haerens P., Van Koningsveld M., Armaroli, C. (2011). Storm

C482

impacts along European coastlines. Part 2: lessons learned from the MICORE project. ENVIRONMENTAL SCIENCE & POLICY (ISSN:1462-9011) pp. 924- 933 Vol.14.
