

Interactive comment on “Building and design defects observed in the residential sector and the types of damage observed in recent earthquakes in Turkey” by M. Tolga Çöğürçü

Anonymous Referee #1

Received and published: 19 February 2015

Author should be careful not to use the non-English characters. Seismicity and construction defects are discussed with striking examples in the context of earthquake resistant design. Manuscript is a valuable study in terms of clearly be seen to the causes and consequences of constructional defects. Study can be accepted.
