A very useful list of historical alluvial events in Campania. Let me only to suggest two further articles discussing in details some hydrological aspetcs of these phenomena, and in particular the event of Sarno-Quindici (May 1998) and Cervinara (16 Dec 1999):

Fiorillo F. & Guadagno F.M., Aquino S. & Blasi A. (2001) - The December 1999 Cervinara landslides: further debris flows in the pyroclastic deposits of Campania (southern Italy) - Bull. Eng. Geol. Env., 60, 171-184.

Fiorillo F. & Wilson R.C. (2004) - Rainfall induced debris flows in pyroclastic deposits, Campania (southern Italy) – Engineering Geology, 75/3-4, 263-289.
