Dear Werner Thomas Flueck,

Based on your data, it is certainly interesing that fluoride was no detected in the tephra analysis, in the leachate analysis nor in the periodical water analysis carried out in the area (e.g. CARIGNANO, L & RAVASI, C., 2011; Hufner, R., & Osuna, C., 2011). We did not carry out analysis ourselves, we only compiled available data in order to provide a general assessment of the impact of the Cordon Caulle eruption. So it would be very interesting to compare the different studies. Is it possible to have the coordinates of your samples and the results of your analysis in order to have a more detailed comparison? We are more than happy to discuss the outcomes of all this. Best regards,
