Thanks for the constructive comments. Based on the comments, all the grammatical and typographic errors have been corrected accordingly. 1. The manuscript has been shortened by removing unnecessary and repeated data and text. 2. The text has been reorganized to follow the suggested trend and hydrogeological features of the study area have been included. 3. The technical weaknesses in the manuscript have been strengthened. 4. Grammatical mistakes, a few long sentences and unclear sentences have been corrected accordingly. 5. References were double checked to ensure completeness.
