Received and published: 18 April 2017

We thank the anonymous reviewer #1 for his/her revision.

* Only a very minor, technical point about the quality of the figures 3, 4 and 13 where the coloured circles used to show the percentage of fatalities are too small and not easily readable and the colour scale in the legends should indicate “% of fatalities” and not just %.

Figures 3,4 and 13 have been changed according to the suggestion (enlarged circles and scale legend).
