Dear Referee,

We are very grateful for your encouragements and your valuable comments regarding the interest of our work. Special thanks for the very detailed editing work you have done. We agree that the previous version of the paper had several formal weaknesses that made its full benefit difficult to grasp, especially for people not familiar with a historical approach to natural hazards. We have addressed all the concerns raised as outlined in the detailed response attached to this comment. We would be glad to submit the revised version of the paper to NHESS. We sincerely hope that the changes made will make the article adequate for publication.

With best regards,

C1
