Interactive comment on "Active fault databases: building a bridge between earthquake geologists and seismic hazard practitioners, the case of the QAFI v.3 database" *by* Julián García-Mayordomo et al.

PhD GARCIA-MAYORDOMO

julian.garcia@igme.es

Dear Nicola, thank you very much for your revision. We have followed all your suggestions, and we believe that now the manuscript is of a better quality.

Please find attached your revision with our comments, edited in Adobe using the highlighted text and comment tool. Please, note that in order to keep this option working on the document we had to zipped the file (i.e. you'll download a zip file with the pdf doc inside).

I just want to point out here that the major change done has been including a new figure,

Figure 1, showing Iberia and the faults from QAFI and the Debated Faults databases.

On behalf of the authors, Julián García Mayordomo
