

Dear editor María del Carmen Llasat,

First of all, we would like to thank you for your review process which helped to improve the article substantially. We have followed all the instructions given by you and the reviewers. Particularly:

- The entire text has been revised by an official science related translator (International Science Editing, Bay K, Unit 11A, Shannon, Ireland). You can find the language-related changes highlighted in blue color.
- We have addressed all the reviewer's comments. You can find these changes highlighted in color red. The most important changes that we have made in this latest version of the manuscript are:
 - ◆ We have added two important tables; the first table is related to the number of events and the second table gives a brief description of each weather type considered in the analysis.
 - ◆ We have updated Figures 4 and 5, so that all the y-axis have the same limits to facilitate the comparison between them.
 - ◆ We have extended the discussion about the previous works published on this matter.
 - ◆ We have adapted all the dates to the English writing style.

We hope these changes will meet your expectations.

Kind Regards,

Jorge Eiras-Barca
