

Interactive comment on “Technical notes: Rainfall threshold calculation for debris flow early warning in areas with scarcity of data” by Hua-li Pan et al.

S. Segoni (Editor)

samuele.segoni@unifi.it

Received and published: 18 November 2017

Dear Authors, this comment is to invite you to start working on the revision of the manuscript. As you can see, the 3 referees' reports and the interactive comment pointed out several issues that need to be properly addressed. During the revision of the manuscript, I recommend you to take in great consideration ALL comments received. The revised version of the manuscript will be sent again to referees for a second round of review.

I suggest you to start working on the revision before the end of the open discussion, if you want to save some time and to speed up the review process.

Regards,

C1
