Received and published: 18 November 2017

Dear authors, even if the open discussion is still open and others short comments may be posted, all referees' reports have been received. Therefore, if you are interested to speed up the revision process, I invite you to start working on the answers to the comments and on the revised version of the manuscript. I recommend you to take into consideration ALL comments received, as the reports highlight several points that need to be better addressed before publication.

Regards,

C1
