Re: Resubmission of manuscript "Analysis of the risk associated to coastal flooding hazards: A new historical extreme storm surges dataset for Dunkirk, France", nhess-2017-417

Copernicus Publications
Editorial Support

Dear Editor,

Thank you for accepting our manuscript "Analysis of the risk associated to coastal flooding hazards: A new historical extreme storm surges dataset for Dunkirk, France" with minor corrections. We also thank all the reviewers for giving us the opportunity to improve it.

All the changes in the revised manuscript were made using "track changes". Also point by point answers were introduced. We would be very happy, if the revised manuscript will now fulfill the high standards of the "Journal of Natural Hazards and Earth System Sciences" for publication.

Thank you again for consideration.

Yours sincerely,

Yasser Hamdi
