Interactive comment on "Regional physically based landslide early warning modelling: soil parameterisation and validation of the results" *by* Teresa Salvatici et al.

Anonymous Referee #3

Received and published: 4 February 2018

One point not discussed in my first comments: Where is the relation with early warning system?It is a little explianed but it is not justify the term "early warning" in the tittle. I think you have to improve this topic in your text if you want to improve your it.
