Received and published: 31 August 2018

Dear Reviewer,

We wish to thank you for the very constructive comments and for the positive opinion on our manuscript. The points which have been raised gave us the opportunity to discuss in deeper detail some features of the downscaling method, which we didn't examine in depth in the previous version.

The detailed answers to your comments are reported in the attached file in bold italic.

Best regards, Silvia Terzago and co-authors
