Thanks a lot for the two reviewers' comments. We have revised the English grammar and usage of the manuscript by asking a native English speaker for help according to their suggestions. The improved language certificate can be available in the supplement file. The details of revised parts are as follows:

(1) The introductory section has been rearranged and shortened according to the suggestion form the referee #1, the content is controlled in two pages. The part content of Section 2 was merged into the Section 3.

(2) The data in this study was described in more detail by both texts and figures (see Fig. 5 in the revised manuscript) to provide more information about liquefied sites and severe damages to sites. The added context can be found in Section 3.1 that was marked in red.

(3) Qualities of all figures in this study have been improved with 300dpi that can be found at end of the manuscript.

To whom it may concern

The paper "Risk assessment of liquefaction-induced hazards using Bayesian network based on standard penetration test data" by Tang Xiaowei, Bai Xu, Qiu Jiangnan, Hu Jilei was edited by Elsevier Language Editing Services.

Kind regards,
