

Dear Prof. Margreth Keiler

Thank you so much for the message. It is a great news for us.

Per your request, we have included the historical loss records in Fig. 6 so a direct comparison is possible now. Missing data issue has been explained in the caption.

We have also double-checked the mathematical notation and English and house standards issues following the guidelines of NHESS.

Again, thank you for all your kind help during the process of revision the manuscript. We are ready for any further request from you and other editors to get the manuscript ready.

Cheers,

Tao
