

Interactive comment on “State of the art of fragility analysis for major building types in China with implications for intensity-PGA relationships” by Danhua Xin et al.

Anonymous Referee #2

Received and published: 25 October 2018

The paper is an interesting synthesis and analysis of Chinese damages data to derive fragility curves for buildings and to propose IM-PGA relationships to be used in China.

It is accepted after minor revisions which are described together with other comments in the attached supplement pdf file
