Dear authors,

This is surely a nice piece of work for the specific community addressed. I fear, that the relevance outside this community is at this stage quite limited.

Manuscripts reads more like an NGO report and less like a scientific paper, but I have to admit that I am not used to read/write manuscripts with much text and few facts as usually done in the risk-management community.

Further remarks:

(Too) Large use of abbreviations do not ease the reading.

See the annotations in the manuscript for further comments.

Best regards

Massimiliano Zappa
