Interactive comment on "Perception of the flash flood hazard by the population of Mindelo, S. Vicente (Cape Verde)" *by* Bruno Martins et al.

Bruno Martins et al.

bmscmartins@gmail.com

Received and published: 29 January 2019

The authors deeply appreciate the comments provided and the suggestions to improve the paper. A bibliographic review will be done in order to include more recent references. In the rewritten article the authors will proceed to clarify the concept of flash floods avoiding in this way an eventual confusion (mix) with the floods. They will also carry out the temporal and spatial contextualization of flash flood and as well as the geographic (physical and social) framework of the island of S. Vicente.
