Interactive comment on "Probable Maximum Precipitation Estimation in a Humid Climate" by Zahra Afzali Gorouh et al.

m. azizabadi farahani

mas_farahani66@yahoo.com

Received and published: 23 February 2018

The paper uses standard methods. Publication of the results could be useful for practical application in this region. The authors briefly describe the development of a Javabased software application that could be used to facilitate estimates. It would be helpful if the authors provided information on how a practitioner could access this Java program.
