

First, we would like to thank you for evaluation and highlighting the deficiencies in the manuscript. It is indeed valuable addition and help us to improve our manuscript. It looks far better than what I submitted initially. Thank you very much for your valuable comments.

Please find below our response to comments.

Comments	Response
scale of the figures: use "km" and not "Kilometers"; also please keep the same format (and style), therefore, in few figures, delete the word "scale" that it is not necessary;	We changed as suggested.
(a)(b)(c)... letters of the figure: also in this case use the same style and font in all the figures;	We changed as suggested.
conclusions: avoid to cite the name of the software or the number of figures, since they are not necessary for the conclusions;	We removed as advised.
I would recommend again a general check of English.	We checked the language (grammar) and typing mistakes.
