Received and published: 12 March 2019

Thank you very much for your careful check and the sound suggestions proposed, which greatly enhances our understanding. We appreciate and read your comments very seriously. The detailed response is separately written in the supplementary document. If you are interested in the details about the infinite impulse recursive filter method. Please send a message to xiequancai@iem.ac.cn, I will send the related materials and explain more details via email.)

Please also note the supplement to this comment:
